Understanding Cleaning Time Standards Understanding and using time standards can set your company apart from the crowd if implemented correctly. For this series of articles, I will refer to the ISSA 540 Cleaning Times Standard created and compiled by John Walker of ManageMen, Inc.

Understanding Cleaning Time Standards

Column 4 - Represents the industry average productivity rate and equals the amount of square metres/square feet one operative would clean in one hour for that particular 'type' of area. (e.g. washroom cleaning would attract a much lower productivity rate than an office area because of the complexity of the tasks required).

1. How to apply the Productivity Tables
