Research Paper (undergraduate) from the year 2015 in the subject Library Science, Information- / Documentation Science, , language: English, abstract: This paper assessed attitude of students in selected rural and urban Junior High School in Cape Coast Metropolis towards the study of Information and Communications Technology (ICT). Descriptive research design was adopted and questionnaire was administered to 203 students from selected Junior High Schools in rural and urban areas which are located in the Metropolis. Predictive Analytics Software (PASW) version 18 for Windows was used to analyse the data. Frequency and Independent t-test were the tools used to aid in data analysis with respect to demographic characteristics and test the two hypotheses formulated to guide the study respectively. The result from the study has revealed that there is a significant difference in attitudes of Junior High School students in rural and urban areas and in terms of gender; the study points to the fact that there is no significant difference in the attitude of male and female students towards the study of ICT in the Cape Coast Metropolis.

Distance learning has existed in some form for centuries, but modern technologies have allowed students and teachers to connect directly, no matter what their location, using the internet and mobile devices. Mobile Pedagogy and Perspectives on Teaching and Learning explores the tools and techniques that enable educators to leverage wireless applications and social networks to improve learning outcomes and provide creative ways to increase access to educational resources. This publication is designed to help educators and students at every level optimize the use of mobile learning resources to enhance educational experience and improve the effectiveness of the learning process regardless of physical location.

In today's world, ICT has become a major tool and part of our lives. It has become so important today that it has made it imperative for young people to be competent in the use of ICT for many tasks they will have to accomplish. There is no shadow of doubt that ICT has become one of the modern major tools for development. To some extent, in today's world, the growth and the success of government and non-governmental organizations and other business corporations depend on the use of ICT in their operations. To make the Ghanaian child grow and become well-endowed in ICT in order to compete in today's era of advanced technology and contribute effectively to the development of the nation, the Government of Ghana, in 2007 introduced ICT as a major subject of study at Basic Education Level. In spite of the crucial role ICT plays, pupils especially those at the foundational level lack the basic skills and knowledge in ICT and this manifests in their performance in ICT at the BECE. A careful study of the examiner's report for BECE clearly shows that pupils who wrote the BECE lack understanding of the basic ICT concepts and the questions they asked. This book has been done to make it easier for the teachers and the pupils to keep up with the content of the syllabus. The questions are simple and could be answered by all Junior High School students and useful to Senior High Schools as well as colleague ICT teachers in the basic schools. It can be said confidently and without any dispute that students who use this booklet assiduously would see a great improvement in the way they answer ICT questions at the BECE.

Published in the year 1971, *The History of Education in Ghana* is a valuable contribution to the field of History.

This engaging open access book discusses how a values and valuing perspective can facilitate a more effective mathematics pedagogical experience, and allows readers to explore multiple applications of the values perspective across different education systems. It also clearly shows that teaching mathematics involves not only reasoning and feelings, but also students' interactions with their cultural setting and each other. The book brings together the work of world leaders and new thinkers in mathematics educational research to improve the learning and teaching of

mathematics. Addressing themes such as discovering hidden cultural values, a multicultural society and methodological issues in the investigation of values in mathematics, it stimulates readers to consider these topics in cross-cultural ways, and offers suggestions for research and classroom practice. It is a valuable resource for scholars of mathematics education, from early childhood through to higher education and an inspiring read for all mathematics teachers.

This text explores the multidisciplinary context of African Indigenous Knowledge Systems from scholars and scholar activists committed to the interrogation, production, articulation, dissemination and general development of endogenous and indigenous modes of intellectual activity and praxis. The work reinforces the demand for the decolonization of the academy and makes the case for a paradigmatic shift in content, subject matter and curriculum in institutions in Africa and elsewhere – with a view to challenging and rejecting disinformation and intellectual servitude. Indigenous intellectual discourses related to diverse disciplines take center stage in this volume with a focus on education, mathematics, medicine, chemistry and engineering in their historical and contemporary context.

This book focuses on the integration of information and communication technologies (ICT) into K-12 education. It documents the authors' reflections on the approaches and issues that have facilitated implementation of ICT integration in education as well as their experience in integrating ICT in education at multiple levels – policies that empower schools; learning environments that encompass the hardware, services and support systems; school-based teaching and learning frameworks; research and development of ICT-enabled pedagogies and innovative professional
