A study of the landmark television program The Simpsons which focuses on the show's dual roles as subversive political satire and mainstream mass media hit.

The trauma of Hiroshima and Nagasaki demonstrates the limits of dominant visual models, such as photography, for providing adequate historical memory. The author argues that collective traumas suggest the need for a prolonged gaze, such as can be provided by expressive art.

Television Studies: The Basics is a lively introduction to the study of a powerful medium. It examines the major theories and debates surrounding production and reception over the years and considers both the role and future of television. Topics covered include: broadcasting history and technology institutions and ownership genre and audiences Complete with global case studies, questions for discussion, and suggestions for further reading, this is an invaluable and engaging resource for those interested in how to study television.

An important new look at Cold War art on both sides of the Atlantic

This is the remarkable story of an individual who experienced severe stress starting in the womb. Growing up in a highly dysfunctional family, he used intellectualization as a defense against overwhelming emotional pain. A high academic achiever, this young man was on the Dean's List at Brown University when he suffered a catastrophic neurological collapse. Labeled as schizophrenic, he was on the verge of death as his twentieth birthday approached. Starting to jog, he avoided his demise. Four years later, this individual found psychoanalyst Erich Fromm's The Sane Society while browsing in a bookstore. Unable to work or communicate normally with people, he began a long intellectual odyssey which ultimately involved the reading of thousands of books about American society. Miraculously transformed by a bodywork technique developed by Moshe Feldenkrais, he continued to live with severe stress due to his lack of social skills and the crazy-making institutions of an aggressive society. Nine years after relearning to use his body properly, this man discovered psychoanalyst Alice Miller's For Your Own Good: Hidden Cruelty in Child-rearing and The Roots of Violence. Reading many other books about child abuse and human development, he began to understand the reasons which had caused his ordeal. This engrossing story is a unique combination of memoir and academic study. People interested in psychology, education, human development, American culture, and social criticism will find much to ponder in it.

How the media are complicit in hiding the fact that 9/11 was an inside job.

Why Good People Do Bad Things sheds new light on the ethical dilemmas of modern life. It shows how people of good will who are generally thoughtful, caring, and reasonably well balanced can unwittingly contribute to the evils present in our social systems.In exposing these situations, this book also offers the hope that these same "good people" can take a fresh look at the world around them. In doing so, they can then see the potential of our world as well as its defects, and determine to be part of the solution rather than part of the problem.

Mainstream American poetry of the 1950s has long been dismissed as deliberately indifferent to its cultural circumstances. In this penetrating study, Edward Brunner breaks the placid surface of the hollow decade to reveal a poetry sharply responsive to issues of its time. Cold War Poetry considers the fifties poem as part of a dual cultural project: as proof of the competency of the newly professionalized poet and as a user-friendly way of initiating a newly educated, upwardly mobile postwar audience into high culture. Brunner revisits Richard Wilbur, Randall Jarrell, and other acknowledged leaders of the period as well as neglected writers such as Rosalie Moore, V. R. Lang, Katherine Hoskins, Melvin B. Tolson, and Hyam Plutzik. He also examines the one-sided authority of the (male-dominated) book review process, the ostracizing of female and minority poets, poetic fads such as the ubiquitous sestina, and the power of the classroom anthology to establish criteria for reading. Attributing the gradual change in poetic style during the 1950s to the slow collapse of the authority of the state, Brunner shows how a secretive, anxious poetics developed in the shadow of a disabled government. He recontextualizes the much-maligned domestic verse of the 1950s, reading its shift toward the private sphere and the recurrent image of the child as a reflection of the powerlessness of the post-nuclear citizen. Through a close examination of poetry written about the Bomb, he delineates how poets registered their growing sense of cosmic disorder in coded language, resorting to subterfuge to continue their critique in the face of sanctions levied against those who questioned government policies. Brilliantly decoding the politics embedded in the poetry of an ostensibly apolitical time, Cold War Poetry provides a powerful rereading of a pivotal decade.
