If you want to rob a bank, Alf Carter is the man to do it for you. Unfortunately, he's been banged up for five years with no chance of parole. MI6 agent Sally Shagwell is going to have to break him out of jail and fast. Documents of an extremely compromising nature have been deposited in a top security vault in Rio de Janeiro. British Intelligence wants them back but they cannot send in their own team and risk a diplomatic incident. Alf and his crew will have to do the job instead. It is up to Sally to smuggle them into Brazil and keep the local Mafia at bay just long enough for them to carry out the heist. If they pull it

off, it might just be the crime of the century.

In *Contesting Hydropower in the Brazilian Amazon*, Ed Atkins focuses on how local, national, and international civil society groups have resisted the Belo Monte and São Luiz do Tapajós hydroelectric projects in Brazil. In doing so, Atkins explores how contemporary opposition to hydropower projects demonstrate a form of 'contested sustainability' that highlights the need for sustainable energy transitions to take more into account than merely greenhouse gas emissions. The assertion that society must look to successfully transition away from fossil fuels and towards sustainable energy sources often appears assured in contemporary environmental governance. However, what is less certain is who decides which forms of energy are deemed 'sustainable.' *Contesting Hydropower in the Brazilian Amazon* explores one process in which the sustainability of a 'green' energy source is contested. It focuses on how civil society actors have both challenged and reconfigured dominant pro-dam assertions that present the hydropower schemes studied as renewable energy projects that contribute to sustainable development agendas. The volume also examines in detail how anti-dam actors act to render visible the political interests behind a project, whilst at the same time linking the resistance movement to wider questions of contemporary environmental politics. This interdisciplinary work will be of great interest to students and scholars of sustainable development, sustainable energy transitions, environmental justice, environmental governance, and development studies.

For most of the twentieth century, Brazil was widely regarded as a "racial democracy"-a country untainted by the scourge of racism and prejudice. In recent decades, however, this image has been severely critiqued, with a growing number of studies highlighting persistent and deep-seated patterns of racial discrimination and inequality. Yet, recent work on race and racism has rarely considered gender as part of its analysis. In *Negras in Brazil*, Kia Lilly Caldwell examines the life experiences of Afro-Brazilian women whose stories have until now been largely untold. This pathbreaking study analyzes the links between race and gender and broader processes of social, economic, and political exclusion. Drawing on ethnographic research with social movement organizations and thirty-five life history interviews, Caldwell explores the everyday struggles Afro-Brazilian women face in their efforts to achieve equal rights and full citizenship. She also shows how the black women's movement, which has emerged in recent decades, has sought to challenge racial and gender discrimination in Brazil. While proposing a broader view of citizenship that includes domains such as popular culture and the body, *Negras in Brazil* highlights the continuing relevance of identity politics for members of racially marginalized communities. Providing new insights into black women's social activism and a gendered perspective on Brazilian racial dynamics, this book will be of interest to students and scholars of Latin American Studies, African diaspora studies, women's studies, politics, and cultural anthropology.

This book analyzes Brazil's foreign relations, politics, domestic economy, international economic relations, and relations with multinational corporations. It identifies the balance-of-payments crisis in the late 1970s as the key to Brazil's economic and political future.

Latin America and the Caribbean are often placed in the same geographical and economic grouping. However, too little is known in either region about the other's business cultures and marketplaces. *Marketing in Latin America and the Caribbean* is a casebook that analyses the marketing histories, challenges, strategies and vision of small, medium and large indigenous businesses from South America, Central America, Mexico and the Caribbean. The book is divided into three core sections: Marketing Tactics, including product development, pricing and digital marketing; Marketing Strategy, which considers brand development, targeting and positioning, and competitive advantage; and, Global and Regional Marketing, considering strategic alliances, global expansion and supply chain management. The work also captures the competitive strategies used by indigenous firms to drive regional and global expansion in the face of sometimes turbulent marketing environments: several of the cases in the book encourage student readers to assess the impact of the COVID-19 pandemic on the strategies and futures of Latin American and Caribbean firms. Filling a gap in the literature by focusing on this understudied region and its indigenous firms, this text is essential and recommended reading for advanced undergraduate and postgraduate students studying International Marketing, Marketing Management and Strategy. It will also be of use to academic faculty seeking classroom material that captures authentic Latin American and Caribbean marketing realities. The work is supplemented by detailed Teaching Notes for each chapter, available online for instructors.

The COVID-19 pandemic has caused severe human suffering and triggered a deep recession in Brazil. Economic policies reacted in a timely and decisive manner to the crisis, supporting millions of Brazilians. But a strong and inclusive recovery from the recession will require long-lasting improvements in economic policies. Improving fiscal outcomes remains one of Brazil's principal challenges given a high debt burden, to which the pandemic has added significantly. Public spending will need to become more efficient, including by building on past progress in the fight against corruption and economic crimes. Social protection can be strengthened through a better focus on the most effective policies and benefits, which could allow significant reductions in inequality and poverty. Stronger growth will hinge on raising productivity, which has been virtually stagnant for decades. This requires addressing underlying policy challenges, including reducing regulatory burdens, reforming taxes, strengthening judicial efficiency and fostering a stronger integration into the global economy. Raising productivity implies reallocations and structural changes in the economy, which should be accompanied by well-designed training and education policies. Training with a strong focus on local skill demand can help workers master the transition and seize new opportunities to move into better jobs. **SPECIAL FEATURES: BOOSTING PRODUCTIVITY; SKILLS POLICIES TO FACILITATE STRUCTURAL ADJUSTMENT**

He covers a major aspect of the history of the international abolition of the slave trade.

Going Digital in Brazil analyses recent developments in Brazil's digital economy, reviews policies related to digitalisation and makes recommendations to increase policy coherence in this area.

This book provides the first comprehensive analysis of globalization's impact on the Brazilian legal profession. Employing original data from nine empirical studies, the book details how Brazil's need to restructure its economy and manage its global relationships contributed to the emergence of a new 'corporate legal sector' - a sector marked by increasingly large and sophisticated law firms and in-house legal departments. This corporate legal sector in turned helped to reshape other parts of the Brazilian legal profession, including legal education, pro bono practices, the regulation of legal services, and the state's legal

capacity in international economic law. The book, the second in a series on Globalization, Lawyers, and Emerging Economies, will be of interest to academics, lawyers, and policymakers concerned with the role that a rapidly globalizing legal profession is playing in the development of key emerging economies, and how these countries are integrating into the global market for legal services.

This report extends the picture of literacy skills th PISA 2000 provides to additional countries that have recently joined the programme: Albania; Argentina; Bulgaria; Chile; Hong Kong-China; Indonesia; Israel; FYR Macedonia; Peru; Romania and Thailand.
